**CIRCULAR and CALL FOR PAPER**

## **Dear Colleague,**

It is a great pleasure to announce that the 11th International Symposium on Inorganic Phosphate Materials 2023 (ISIPM-11) will be held on November 22 to 24, 2023 in Venice which is located northern part of Italy and a wonderful place to meet all of the researchers together. The first international symposium has been organized in 1991 (Tokyo Metropolitan University, Tokyo, Japan) with great initiative and momentum. Since then, ISIPM encouraged the basic research and application activities on inorganic phosphate materials in the world. A series of the symposiums from 1<sup>st</sup> to 10<sup>th</sup> ISIPM have provided a precious occasion for a collaboration between academic scholars and industrial researchers. A large number of scientists, engineers, research staff and students from universities, research institutes and related industrial companies have joined the ISIPM symposiums. Regarding the 11<sup>th</sup> ISIPM symposium (2023) in Venice, Italy, we hope that this meeting becomes the memorable platform on the ISIPM program for the promotion of fundamental and technological research activities on inorganic phosphate materials.

We are looking forward to meeting you in Venice!
